

# Wie aufwändig ist der Einbau der Zylinder, wer kann diesen durchführen?

 Kentix accepts no liability for damage caused by improper installation.

The installation of the cylinders can be done by anyone and it works as follows:

By removing the forend screw the old cylinder is removed and the online cylinder is inserted afterwards. A new forend screw is included with each Kentix profile cylinder.

Please note that the online knob with the RFID reader is mounted on the outside or electronic side, on the inside or mechanical side there is a mechanical knob. It is also possible to install an online knob on both sides, for that the mechanical knob can be removed and replaced.

Here you get a more detailed description for the installation of [DoorLock-DC BASIC](#) and [DoorLock-DC PRO](#).

 Further information about the Kentix DoorLock can also be found in our ordering help in the [Partner Portal](#) and in the [quick reference guide](#).
