

i-PRO Network Video Recorder with 16-32 camera channels - MANUAL

ORDER-CODES: [KWVS4556L](#)

The iPro NX Series network video recorders are characterized by high reliability and security. These H.265/H.264 network video recorders offer an integrated graphical user interface and first-class IP security, enabling secure end-to-end surveillance solutions for mission-critical applications. No additional PC is required. All AI-enabled i-PRO cameras record encrypted streams in accordance with the FIPS 140-2 Level 3 standard. In addition, the i-PRO NVRs are NDAA compliant.

The scalability of the i-PRO NVRs allows you to easily adapt your Kentix security system to your individual requirements. The remote monitoring option enables real-time monitoring from almost anywhere in the world, which significantly increases flexibility and speed of response. Integration into KentixONE is achieved via SNMP and direct video streams.
