KentixONE – First Steps Part 3: Install Satellites

This video shows the commissioning of satellites.

This video shows the commissioning of satellites using the example of an AccesManager KXP-2-RS and a Multisensor TI.

Explained are:

- The commissioning with the installation wizard.
- The selection of protocol version V1 or V2 for the AccessManager LAN KXP-2-RS depending on the version of the WallReader used.
- Selecting the operating mode "Satellite" and specifying the address of the main device.
- Adding the satellite to the project in KentixONE on the main unit.
- Selecting the alarm group in KentixONE.
